Projects

❖ Fermentation Product : Wine

The project work was based on a fermented alcoholic production from different fruits. My team has been working on this project for the past two months under the guidance of Dr. Viral Shukla Bhatt. Fenil Umaretiya and Hasti Barot are two members in the team. By these I learn about alcohol estimation and sugar estimation.

❖ Biodiesel Production:

We use different oils. In these lessons we will be taking a look at the environmental impact of pollution and investigating how biofuels can be used as an alternative fuel. My team member are Jay Patel, Dhruvi Prajapati and Abhay Lathiya Under the guidance of Chintan Oza We learn about transesterification reaction.

Industry Visits

- ❖ **Directorate of Forensic Science (Forensic lab) :**
Learnt about forensic, crime and investigative techniques.
- ❖ **Pirana Sewage Treatment Plant : Water treatment plant :**
Learnt about waste water treatment

Exhibition Visits

- ❖ **INNOVATION VILLAGE, LIAS (2019) :**
It was a great experience. By visiting this know about application of science and technology at student level.
