

## Curriculum Vitae

### Objective:

*To obtain a scalable position in the Medical Laboratory / Testing Industry, by seeking a suitable opportunity, where my skills and knowledge gained in the Medical Laboratory areas get utilized for the growth of the industry.*

### Career Synopsis:

- Around **13 years** of experience in Medical Laboratory industry with extensive knowledge in Testing and Recording of various Medical Tests.
- Proven capability in working with small / large-sized teams with positive outputs, excellent rapport and communication abilities.
- Marked involvement in departments of Hematology and Bio- chemistry
- Expertise in Fever profile, Lipid profile and Pre-operative test
- A team player with good planning, organizing and Inter-Personal skills while being sensitive to patient needs.

### Work Experience:

#### 2008 – 2014 OM Laboratory [Laboratory technician]

OM Laboratory is a computerized diagnostic center, where all type of pathological test are done on clinical specimens of the patients-blood, urine, tissue, stool and others, in order to identify or determine the nature of disease.

#### Roles and Responsibilities:

- Specimen collection evaluation and processing.
- Perform routine tests in hematology and bio chemistry department.
- In hematology: bloods smear preparation, evaluation and miscellaneous tests like ESR.
- Routine bio-chemistry tests like Glucose, Creatinine, Urea, Cholesterol, S.G.T.P., Serum Triglycerides, RA, Uric Acid, and ALK. Phosphatase, Serum Calcium, Billirubin, Total Protein, Albumin and Others by using auto chemistry analyzer LW C100.
- Electrolytes-Serum Na<sup>+</sup>, K<sup>+</sup> and Ca<sup>++</sup> by using electrolytes analyzer LW E60.

#### 2002 - 2007 Akshar Pathology Laboratory [Laboratory Technician]

- Collect blood samples to define the no. of cells, their morphology or their blood group, blood type or compatibility for transfusion purpose using microscopic techniques.
- Conduct Chemical Analysis of body fluids like blood, urine or spine fluid using automatic analyzer to detect abnormalities or diseases.
- Perform basic medical laboratory tests and analysis as ordered by the physician but under the supervision of medical laboratory technologist.
- Operate, calibrate or maintain the laboratory equipments used in the quantitative and qualitative analysis.
- Enter data from analysis of medical tests in to computer for storage.

**Responsibilities:-**

- Collect blood samples from patient's body
- Conduct chemical analysis of body fluids like blood or urine.
- Prepare standard volumetric solutions or reagents.
- Setup, maintain, clean and calibrate the lab equipments.

**Major Strengths:**

---

- Detailed understanding of performing lab procedures and post experiment process
  - Adapt at performing manual and automated blood test
  - Proficient in explaining lab procedures to visitors
  - Abilities to prioritize multiple tasks and responsibilities
  - Profound ability to plan and schedule activities effectively
  - Accurate performance, even under stressful circumstance
  - Dedication, co-operation, neatness and a carrying attitude
- 

**Education:**

---

1. **Post Graduate Certificate in Medical Laboratory Technician**, from Technical Examinations Board, Gujarat , Dist. Gandhinagar June - 1999 with Second Class Division.

2. **Bachelor of Science in Microbiology Major**, from Gujarat University, Dist. Ahmedabad, April - 1998 with Second Class Division.

**English Proficiency:**

---

IELTS with Listening, Writing & Reading with 6.0 bands and Speaking with 7.0 bands appeared on 9<sup>th</sup> January, 2016.

**Personal Details:**

---

Date of Birth	:	6 <sup>th</sup> June, 1977
Languages	:	English, Hindi & Gujarati
Permanent Address	:	A-3 / 27, Radhe Residency – Part – 2, Near Akashganga Bunglows, B/h St. Mary School, Nava Naroda, Ahmedabad – 382330, Gujarat, India
Present Address	:	Same as Above
