PROJECTS

Ram Pump irrigation system , November 2020 - June 2021

- Hydraulic ram pumps are very inefficient, generally pumping only one gallon of water for every eight gallons of water passing through the ram. They will, however, pump water up ten feet (or more in some cases) of vertical elevation for every foot of elevation drop from the water source to the hydraulic ram.

Design of flexible belt grinding machine , April 2020 - November 2020

- The grinding machine works on the principle of the grinding process. This is a machining process in which finishing work is carried out on the workpiece. In this process, a solid object composed of abrasive particles is given a relative motion with the workpiece
