## SUMMARY

- Highly dedicated and career-oriented professional with over five years of progressive experience as an Electrical Engineering professional pertaining to power plant management, preventive & corrective maintenance, management information systems, inventory management, and cost controlling in Engineering Industry
- Proficiency in calibrating instruments and performing quality control inspections
- Hands-on experience in maintaining & investigating the root cause failures, troubleshooting, reporting and documentation
- Dexterous in preparing proposals, budgets, capital cost estimations, equipment specifications, and monitoring cost control
- Skillful in enhancing positive internal and external working relationships to effectively coordinate work activities
- Strong communication, analytical, collaborative and project management abilities to be able to interact with clients and understand/resolve issues

## SKILL SET

- |                                 |                             |  |
|---------------------------------|-----------------------------|--|
| • Power Plant Management        | • Budgeting                 | • Maintenance & Troubleshooting                              |
| • Power Generation/Distribution | • Inventory Management      | • MIS Reports  |
| • Cost Controlling              | • Reporting & Documentation | • Electrical Equipment & Instrument Selection & Installation |

## EDUCATION

- Post graduate diploma management in marketing from Gujarat University, India - 2016
- Bachelor of Electrical Engineering from LDRP Institute of Technology and Research, Gujarat Technological University, India - 2014

## WORK EXPERIENCE

Electrical Engineer at Nandan Denim Ltd (Chiripalgroup ), India

Aug 2014 - Till Date

### KEY DELIVERABLES

- Administering the regular activities of Electrical related power plant, preventive & corrective maintenance and MIS
- Managing the entire gamut of raw material cost, power generation cost, power distribution, losses incurred during generation & distribution of power and inventory management
- Preparing & updating MIS on regular activities to head of the department and to the vice president
- Validating, optimizing and efficiency analyzing of cost savings and reduction of energy throughout the plant
- Providing inputs for capital cost planning and cost forecasting, for all electrical power distribution infrastructure
- Preparing revenue generation model

## LANGUAGE

- Proficient in English

## AVAILABILITY

- Ready to relocate immediately; Possess no bond with the current employer
