PROJECTS

CREATING A WEBSITE FOR ECOMMERCE USING INTERFACE DESIGN - WEB DEVELOPMENT AND HUMAN COMPUTER INTERFACE

Jan 2023 - May 2023

- The name of the website was Wrappers. This project on the human-computer interface was done by me and my groupmates where we used Django framework and using Python we created the website.

- The interface designs were created on Figma and wireframing and prototyping was done.

- We used various concepts on a human-computer interface like Graphical User Interface Elements like widgets, dropdown lists, and radio buttons.

Git repo link :- https://github.com/iuoiubn/wrapeers/tree/main

Drowsiness Detection System - INTERNET OF THINGS   **Jan 2023 - May 2023**
 -This was a group project where a working prototype was created. The main aim of the project was to create a model which could prevent accidents from happening due to drowsiness of the driver.

-This project includes one Gsm module, Arduino, Electric motor, Relay, and Eyeblink Sensor.

-The Rider has to ask the cab driver to wear the Glasses containing the eye blink sensor then if the driver blinks his/her eyes then a message is sent to the cab rider.

Customer Personality Analysis With Deployment - Problem Bassed Learning   **Jan 2023 - May 2023**
 - In this project, we have divided the customer groups into different segments based on parameters like Age, Children in the family, Income

:- In this project, we have divided the customer groups into different segments based on parameters like Age, Children in the family, Income, Marital status, etc.

:- we used Streamlit for the deployment of the model.

:- we used different ml methods for creating the models. This project was done on Kaggle.
