WORK EXPERIENCE

Bank of America, Gandhinagar - *Quality Specialist*

July 2020 - Present

- Received a Silver Award for leading the transformation of manual document management procedures into automated processes using UFT, resulting in a 25% reduction in regression testing time.
- Successfully automated one internal application using UFT, streamlining testing efforts.
- Transformed pre-existing UFT scripts into Selenium using BDD frameworks for a proof of concept (POC), resulting in enhanced test maintainability and efficiency. This initiative led to a time savings of one full day.
- Conducted training sessions and shared knowledge on Selenium automation within the team, fostering a collaborative testing culture.
- Established Git version control system on Bitbucket, introduced project branching and consistently pushed code changes to enable seamless code tracking and improved collaboration within the team.
- Resolved issues in existing automation scripts, significantly enhancing the effectiveness of release testing.
- Engineered robust automation frameworks using Selenium for scalable and maintainable test scripts, contributing to efficient test suite management.
- Achieved a notable milestone of zero production issues in the current project over the last 9 months.
- Successfully adapted to LITMUS, streamlining the execution of regression scripts.

Voomp Technologies, Kolkata- *Software Developer Intern*

Nov 2019 - Apr 2020

- Research and creation of financial reports such as Trial Balance and General Ledger Reports using SQL Queries
- Collaborated closely with clients to ensure the effective adoption and implementation of custom metrics and reports, facilitating data-driven strategies.
- Partnered with team leads to enhance key performance indicators (KPIs), contributing to performance improvements.
- Created interactive analysis reports using Power BI, complete with parameters, empowering the team to analyze the company's performance effectively.

ONGC, Ahmedabad- *Intern*

Jun 2018 - Jul 2018

- Created an Android app for editing photos.
- Acquired proficiency in Appium and successfully implemented it in automating tests for my photo editing app.
- Successfully led a team of 5 people for the final internship project.

EDUCATION

SRM Institute of Science and Technology   **Chennai**
B.Tech, Information Technology (2016 - 2020)   Percentage- **84.2%**

SKILLS

Test Automation: Selenium, UFT	**Version Control:** Git (Bitbucket)
Mobile Testing: Appium	**CI/CD:** Jenkins
Database: MySQL	**BDD Framework:** Cucumber
Defect Tracking and Management: ALM, JIRA	**Programming Language:** Java

ACHIEVEMENTS

- Won a Silver Award for implementing automation using RAFT, an internal bank framework based on Cucumber and Selenium, using a BDD framework, enhancing the efficiency of testing processes.
- Recognized with a Bronze Award for exemplary support in release work, regression testing, and Proof of Concept (POC) initiatives. Demonstrated dedication by creating new scripts and providing critical assistance within tight deadlines.
- Acknowledged with multiple awards for promptly reporting multiple simulated phishing attacks, contributing to the enhancement of cybersecurity awareness and resilience.
- Received multiple awards from leadership teams for organizing and executing successful employee engagement activities.
- Secured 3rd position in the Code Camp, a Virtual Hackathon, ISTE.
- Certified Android Developer: issued by Eckovation
